We are trying hard to match the conditions of the major regulatory and oversight bodies to obtain their approvals in order to meet the desires of our clients.

There are many and difficult conditions and we have already passed most of them. One of the conditions stipulates that two years have been audited for the broker, this is one of the conditions that depend on time more than capabilities. We are confident in our clients that we will have their support as we entrusted them until we reach and complete the requirements of the major regulatory to get it.

Fiper.me platform was established officially in 02/2022 after years of real traders experience

Client Money Segregation

client money rules. All client money is held in separate bank accounts and not mixed with the firm's own funds.
